Pipe, Wall, Tank and Integral Mount

The Signet 8450 Pressure Transmitter is a unique instrument that offers local or remote display with current and relay outputs. This model offers exceptional repeatability and accuracy over a wide operating pressure range. The instrument is available in field and panel mount configurations, dual channel input and is equipped with two 4 to 20 mA outputs, fully scaleable and reversible for each input channel. Dual open collector outputs.

The unit also has the ability to accept other sensors with 4 to 20 mA output, via the Signet 8058 Signal Converter. The chemical resistant NEMA 4X/IP65 front face is found in both the highly visible field mount or black panel mount instrument, both featuring a self healing window, a standard ¼ DIN cutout and large push buttons for easy navigation. Programming capabilities are available for single point calibration, setting of outputs, and output simulation function for complete system testing. The dual input version allows difference calculation (ΔP) and offers significant cost savings with independent dual outputs.

Ordering Notes

1. It is advised to protect the capillary tube located on the back of the sensor with the 3-8052-1.
2. Field mount instruments can be mounted with a sensor in an integral configuration by choosing the following:
 - Order integral adapter kit PN 3-8052 (sold separately) to connect the transmitter directly onto the sensor.
3. An optional splashproof rear cover can be ordered separately if needed.
4. Use the universal mounting kit with the field mount transmitter to mount to a pipe, tank or wall.
5. To mount the panel version on a wall, use the heavy duty wall mount bracket.
6. Panel cutout should be 92 mm X 92 mm (3.62 in X 3.62 in.).
